

Will my boarding pass automatically update if there are involuntary changes made to my flight?

Yes, your **mobile** boarding pass will update if there are changes made to your flight.

We recommend being at the gate well ahead of your flight. We will usually *begin boarding about 45 minutes before departure* time, so it's important to be at the gate and ready to board at least **45 minutes prior to scheduled departure**.

Remember, your gate assignment and departure time could change due to operational requirements. You can easily stay updated by checking the flight monitors at the airport and by checking your [Flight Status](#).
